TECHNOLOGY CREW WINS FROM HARVARD 1911

Finishes With Lead Of Three Lengths in Very Hard-Fought Race

Yesterday afternoon on the Charles River, the Technology 'varsity eight defeated the second Harvard junior crew by three lengths over the one seven-eighths course.

Harvard 1911 at first took the lead, but were quickly overtaken and the Institute eight led throughout the rest of the course. The water was rough and so the time of the Technology eight, 10 minutes, 50 seconds, is considered fairly good.

The order:

Second Junior crew—Stroke, Beal; 7, Jackson; 6, Borst; 5, Ellis; 4, Kean; 3, Harding; 2, Hopkins; bow, Wheeler; cox., Cox.

Technology crew—Stroke, Gere; 7, Herreschoff; 6, Baines; 5, Robertson; 4, Whittelsey; 3, Ruby; 2, Gott; bow, Upham; cox., Wettingill.

SENIOR PORTFOLIO

Book Will Contain 310 Photos And 250 Pages

The Senior Portfolio is now in the hands of the printers. The engraving work has been completed, but the binding still remains to be done. The book will appear about May 31. Subscriptions for 220 of the books are in and 250 copies are to be printed. The orders for these copies are all in by this time, so that it is too late to order a book now.

The price of the book will be \$6.00. It will be bound in leather, and it is promised that the printing and style of paper will be something unique. Last year's Portfolio was printed in sepia ink on sepia paper, but this year's committee claim that they have made a decided improvement on this. The book will contain 310 photographs, that is the pictures of all the seniors, of all the men who have been with the class two years, even if they do not graduate with the class, of the heads of the departments, and of the officers of the faculty. There will be photographs of the Class-day Committee and of the Portfolio Committee. The identification of each man will be printed opposite his photograph, on a separate page. The paper will have printing on one side only, so that altogether the book will contain about 250 pages.

ART MUSEUM LECTURE

To-morrow at 3.30 P. M. Ex-President Charles W. Eliot will give a talk in the West Court of the Museum of Fine Arts. The subject of the lecture is "The Training of the Senses and the Artistic Spirit." The talk is free to all.

TECHNOLOGY'S CHANCES IN DUAL MEET WITH WESLEYAN DIMINISHED

Capt. Allen May Not Be Able To Enter-- Kanaly Predicts Tie Score

Technology's squad of track men, twenty-four strong, started for Middletown, Conn., this morning on the 8.24 train from Back Bay. They will arrive in the Wesleyan strong-hold a little after twelve, and then, after lunch, they will go out to Andrus Field where the meet is to be held. The first event is called at 2.30 so the men will only have a short rest before they start the struggle.

On paper, the Wesleyan team seems to be the winner by a very few points. The Tech team will not feel at the best

COACH FRANK KANALY.

after the long trip, but worse news than that is the fact that Captain R. H. Allen is far from being in the best condition. He has been doing much track work lately and has been in all the meets this spring. At the handicap meet he wrenched the muscles of his left thigh and yesterday at the Field, while trying to get in a little extra practice, the muscles were again strained so that now it is very doubtful if he will be able to enter any of the events. Coach Kanaly does not want to take any chances of losing his points in the Intercollegiate. All the

other men are in first-class condition; P. D. White's injury to his knee is coming along nicely and it is not expected to bother him in the least today.

To make up for the possible points that Tech loses by the injury to Capt. Allen, Coach Kanaly is thinking of putting H. G. Watkins 1912 in the mile event but he rather hates to do this in as much as Watkins is relied upon to pull first place in the two-mile run; everything will depend upon how the meet is going whether he will run the two events or only in the long distance run.

Coach Kanaly is not very optimistic as to the results of the dual meet. When seen at the train this morning he said, "I can't see anything better than a tie score. Of course, in all track meets many things are liable to happen that will upset the calculations of either side. We're somewhat handicapped by the competition following so closely after the long train ride but in every instance our men are faster than in other years so that we expect at least to push Wesleyan to their limit in every event."

Captain Allen in a statement last night said that he hoped he would be in better condition today. He had his leg bandaged by the physician and it seems to be feeling quite in shape this morning. As to Tech's prospects this afternoon, he said, "We are certainly not looking for an easy proposition in Wesleyan but the fellows have all been working hard and I feel that the outlook for the Tech team is not as bad as The Tech predicts. It looks as though Wesleyan would capture more firsts than Tech but we hope to pull enough seconds and thirds to win the meet."

The following men taken on the trip: C. E. Trull 1913, H. G. Burnham 1913, W. C. Salisbury 1911, R. H. Gould 1911, P. D. White 1911, W. R. Bylund 1913, R. S. Sampson 1913, J. D. Mackenzie 1911, L. O. Mills 1911, E. B. Germain 1913, R. D. Van Alstine 1912, H. G. Watkins 1912, E. E. Ferry 1912, H. S. Benson 1912 (manager), W. J. Pead 1910, G. B. Cummings 1910, Capt. R. H. Allen 1910, P. W. Dalrymple 1912, H. B. Alvord 1912, W. D. Allen 1911, H. Greenleaf 1912, J. L. Bray 1912, O. V. Chamberlain 1911, N. D. McLeod 1913, and H. Lockett 1911.

1912 VS. 1913

Freshmen Nine Picked To Win Underclass Game Today

Freshmen and Sophomores will clash on the diamond today in the second game of the underclass series. The first game was easily captured by the freshmen and they are confident of taking the game today. In case they do, the championship goes to 1913.

Capt. Severance's nine is putting up a fine game, having lost only one game this season. K. D. Hamilton, their pitcher, is much better than the Sophomore twirlers. Only one hit was made off him in the first game. The freshmen batters hit the ball all over the field last Tuesday, in the first game, so,

by past games, it certainly looks like another freshman victory today.

Crocker, Elwell, Severance, Eastman, Sampson, Thompson, Murdock, Peck, Weller MacKinnon and Hamilton will probably play for the freshmen and the sophs will be represented by Taylor, Sage, Torrey, Allen, Stone, Jones, Coulson, Sloan, Reeves and Maguire.

Pennsylvania has nine outdoor track meets scheduled for this spring.

The baseball management at Columbia is so well pleased with the work that Dave Fultz has been doing with the Blue and White squad this season that they are trying to re-engage him for a period of three years.

The athletic committee at Washington has complained of the scanty apparel which the oarsmen wear at practice and has ordered that in future men be supplied with jerseys, and that they shall keep them on during practice.

KING EDWARD DEAD; GEORGE V. REIGNS

President MacLaurin Pays Glowing Tribute To Memory Of Edward VIII

King Edward VII., who returned to England from a vacation ten days ago in the best of health, died at 11.45 o'clock last night, in the presence of his family, after an illness of less than a week, which was serious hardly more than three days.

The Prince of Wales succeeded to the crown immediately, according to the laws of the kingdom, without official ceremony. His first official act was to despatch to the lord mayor the announcement of his father's death, in pursuance of custom.

His telegram read:

"I am deeply grieved to inform you that my beloved father, the King, passed away peacefully at 11.45 to-night."

(Signed) "GEORGE."

The physicians soon afterward issued their official bulletin.

The official bulletin announcing the King's death read as follows:

"May 6, 11.50 P. M.—His Majesty the King breathed his last at 11.45 tonight, in the presence of Her Majesty Queen Alexandra, the Prince and Princess of Wales, the Princess Royal, the Duchess of Fife, Princess Victoria and Princess Louise, the Duchess of Argyll."

(Signed) "Laking, Reid, Powell, Dawson."

President MacLaurin, a staunch admirer of the lamented ruler and a graduate of St. John's College, Cambridge, Eng., paid the following tribute to the memory of Edward VII.:

"King Edward came to the throne after an unusually long period of probation as Prince of Wales. During that difficult period, he won the affections of his people by his urbanity, his kindness and his intense humaneness. There were times when he was exposed to severe criticisms, but the greater qualities of the man completely outweighed any weaknesses then revealed. His position for many years before Victoria's death called for the exercise of unusual tact, and he won the admiration of all by his skill in dealing with the most difficult situations. Long before he ascended the throne he had acquired an assured position in the heart of his people and was recognized as the national hero."

"Stories of his constant kindness and thoughtfulness for the comfort and feelings of others ran on in an unending stream, and his popularity was greatly enhanced by his evident pleasure in many popular pastimes and his well-known sympathy with popular causes, social and political."

"His intellectual powers, as gauged by academic standards, were not remarkable—at least if there was any foundation for the many stories current in my time of his undergraduate days at Cambridge. But, while Edward had no claims as an intellectual, he certainly was a man of strong mind, capable of dealing with men and affairs."

"The affairs of England, under the constitution today, is of little importance unless he has the ability to make for himself a position of power out of what may so easily become a position of impotence. No one who knows the recent history of England and Europe can fail to recognize that he had been an extremely effective force. He had not been ambitious for power, but with the sterling qualities of the best of his race, he had done much by apparently simple means. Fortunately his influence had all been on the side of peace and good will among the nations."

THE TECH

Published daily, except Sunday, during the college year by students at the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 29, 1910, at the post office at Boston, Mass., under the Act of Congress of March 3, 1879.

BOSTON, MASS., MAY 7, 1910.

The team left at 8.20.

1912-1913 today. Batter up!

Weather conditions are perfect.

"Fitz" went along as "war correspondent."

This is the night the board of editors of Technique 1911 celebrate.

Tech's 'varsity crew makes good on its maiden effort. Congratulations, Captain Gere.

Captain Allen's injury at the eleventh hour is a serious blow to the team's chances.

Don't miss Monday's Tech. A real "live" story of the Wesleyan meet will feature the issue.

A miniature "honor system," as suggested by yesterday's communication, would be welcomed.

One of those bound volumes of the Course issues of The Tech might well adorn any "five-foot shelf."

The King is dead. Long live the King!

By the death of King Edward of Great Britain the world loses one of the ablest promoters of universal peace and justice, Great Britain loses a true statesman and exalted ruler, and America loses a staunch friend.

During his nine years' reign affairs in his kingdom have been singularly serene. Shortly after his accession to the throne the Boer war ended, and since then no hostilities of any seriousness have troubled the nation.

While Britain mourns the death of Edward VII., it faces the accession of George V. It grieves over the loss of one of the most popular monarchs of the times, and, simultaneously, it contemplates welcoming to the throne a comparatively young man whose character must meet the test of one of the gravest crises in English history. May the test be met successfully!

GENERAL NEWS

TELEGRAPH NEWS OF THE MORNING.

WEATHER REPORT.

Washington, May 7—Fair Saturday, light westerly winds.

Wellesley, May 7—The Wellesley College news board is the laughing stock of the institution, simply because it took too firm a hold when it grasped time by the forelock. The members of the board, informed that big journals sometimes are guilty of writing stories of events in advance, decided to be up-to-date, so they assigned one of their number to write a glowing account of the May Day festivities.

The article was sufficiently glowing but the weather man rudely spoiled the program. In making up the paper this little fact was overlooked, so the current issue contains a full account of the festivities which didn't take place, also a picture of the girls dancing around the May pole, which was entirely faithful, except that the dance wasn't held.

Christiana, May 6.—King Frederick's University conferred upon Theodore Roosevelt, today, the degree of Doctor of Philosophy. It was the third time in the history of a century that the degree had been given a foreigner.

The exercises occurred in the amphitheatre of the university. King Haakon entered with Mr. Roosevelt at his right and faced a notable assemblage including the premier and other members of the cabinet, the Nobel prize committee, the diplomatic corps, the faculty of the university and many persons distinguished in civil life.

Seattle, Wash., May 7—The Mount McKinley expedition, headed by Prof. Herschel Parker, of Columbia University, has sailed for Setdovia, Kenai peninsula. The party includes Herman T. Tucker, of Newton, Mass., formerly of the forestry service.

Ottawa, Ont., May 7—After an extended investigation the Quebec bridge board has approved a plan for the superstructure of a cantilever bridge to replace that which collapsed several years ago. Tenders will be invited for the work; but tenderers will not be limited to the design now approved.

The Dominion government will require, not only that the contracting firm accept full responsibility for the project, but also that the firm make a large cash deposit.

Washington, May 7—The world's record for kite flights held by the Weather Bureau Observatory at Mount Weather, Va., has been exceeded by that observatory. Ten kites were used, carrying over nine miles of wire. The head kite reached an altitude above sea level of 23,800 feet, and recorded a temperature of 29 deg. below zero. The previous record was 23,100 feet, with a temperature of 17 below zero.

Washington, May 7—President Taft upon learning of the death of King Edward, wrote the following message of condolence to Her Majesty Queen Alexandra, which was cabled to Buckingham Palace last night:

"On the sad occasion of the death of King Edward, I offer to your majesty and to your son, his illustrious successor, the most profound sympathy of the people and of the government of the United States, whose hearts go out to their British kinsmen in their national bereavement.

"To this I add the expression to your majesty and to the new King, of my own personal sympathy and of my appreciation of those high qualities which made the life of the late King so potent an influence toward peace and justice among the nations."

NOTICES

ELEMENTS OF ELECTRICAL ENGINEERING 653—COURSE II.
The regular Friday lecture will be held this week instead of the recitations, as previously announced.
HARRISON W. SMITH.

LECTURES BY MR. BARNABY.
Lectures will be given by Mr. Sidney W. Barnaby at 4.00 P. M. in Room 11 Engineering Building B on the 10th, 12th, 16th, 18th and 20th, to students of the Department of Naval Architecture and Marine Engineering. Students of other Departments are also cordially invited to attend.
C. H. PEABODY.

COURSE ISSUES.

The Tech is considering having sets of the Course issues bound. The price will of course depend on the number. If those who would desire such a volume would signify such desire by leaving a note to that effect in one of The Tech boxes, matters would be greatly facilitated.

It is understood that this note would in no wise bind the writer, provided the price was considered too high.

The pages have been numbered consecutively in each issue so that they will go together very well in bound form; and so arranged, they would be a source of information on the various courses from a personal standpoint that is nowhere else to be found.

M. J. TURNBULL, 215 Newbury St.

The Monday issue of The Tech will be devoted principally to the interests of Track and Field sports, "here at the Institute." The Tech is to send down to Middletown a man capable to write up a corking fine story of the meet, and of the individual work of each Tech man in it. We will not publish a story rehashed from the inaccurate accounts in the Sunday papers, but a live article by a live Tech man. It will be as good as seeing the meet yourself, to read the account of it in Monday's Tech.

FOR SALE—Technique 1910, \$0.75, at "The Tech" table, Rogers corridor today.

FIRST-YEAR ENGLISH.
